Vicomsoft announces InterGate Policy Manager v9.2 Universal Binary

Vicomsoft today announced the launch of InterGate Policy Manager (PM) v9.2 the first Internet Policy Management software to run natively on both PowerPC and Intel-based Macs. Vicomsoft InterGate (PM) v9.2 sets new standards in versatility, security and user access control. Designed for corporate networks of any size, it protects business critical systems by providing a set of network security and monitoring tools that keeps organizations and users safe from a wide array of Internet threats.

Vicomsoft is delighted to be able to bring new features to the market in InterGate Policy Manager v9.2. Our clients rely on our ability to underpin the critical safety and security of their businesses and their users", said David Townend, CEO of Vicomsoft.

"The advances in our technologies and the ease of use for those charged with implementing secure networks and Internet access, makes InterGate (PM) and Vicomsoft solutions a very attractive and cost-effective option".

Vicomsoft InterGate (PM) v9.2 enables enforced 'Safe Search' on all of the main search engines. This means that inappropriate images can now be excluded from image search engine results, such as Google and Yahoo.

Time controls provide the ability to create and apply Policies, which allow you to manage Internet access by time of day and/or day of the week. As with all InterGate Policy Manager filtering, these time-based filters can be applied on a per-user or per-group basis.

Additional new features include Automatic Login so that users who are pre-authenticated via LDAP or Active Directory, no longer need an additional InterGate (PM) login before accessing the Internet.

This latest version, as always with Vicomsoft solutions, is optimised for Mac OS X, particularly in combination with Apple's Xserve, InterGate (PM) provides superb performance on both Mac OS X and Microsoft Windows operating systems with Internet connections of any size.
More….

"We have large corporates and many SME clients, as well as public sector clients especially in education and the police, using Vicomsoft solutions. The ease of setup and ability to apply flexible filters to any client Operating System gives the IT team peace of mind". Says Paul Conibere, Senior Technical Consultant for Vicomsoft.

Vicomsoft InterGate Policy Manager v9.2 is available from October 3, 2006 as a download from www.vicomsoft.com and there is an upgrade path for existing clients and free trial periods for those looking at deploying new software-based security solutions for their networks and access controls.

Editors Notes:

About Vicomsoft

Delivering innovative Internet and network security solutions for over twenty years has placed Vicomsoft at the forefront of its market. With numerous accolades for its products, the company continues to keep ahead of the curve in terms of its ability to anticipate market needs and to meet them with proven technologies. Over 20,000 organisations in 76 countries use Vicomsoft software solutions. Vicomsoft head office is in Bournemouth, UK and the company has offices in New York, USA.

About InterGate Policy Manager Suite

The InterGate Policy Manager Suite is Vicomsoft's flagship product which offers unequalled flexibility and extensibility for the enterprise to manage and control user Internet activity. It comprises InterGate Intercept for policing access to applications such as Instant Messaging, Peer-to-Peer and Skype; InterGate Inspect, a master database of web categories and InterGate Intelligence for logging and reporting of Internet usage and policy breaches. It also serves as a core router and firewall providing advanced protection from the threats of Internet intrusion.
