

InterGate Inspect is a centrally managed database of over 13 Million Sites covering 2 billion web pages and 40 well-organized categories, which are updated on a daily basis.

InterGate Policy Manager integrates with InterGate Inspect to automatically check against this database for new sites by accessing a suite of Vicomsoft centrally managed servers. Once a web page has been checked, its category is stored in a local cache for future reference.

Over 13 Million Sites, Covering 2 Billion Web Pages

Content is sourced by a team of professional researchers, state-of-the-art automated tools, and customer submissions.

International Content, 70 Languages, 200 Countries

A global research team operating in 20 countries give InterGate Inspect the most reliable international content in the industry. The database represents more than 70 languages, from sites registered in over 200 countries.
